Projects

To-Do List

[View Site](#)

- Built a minimalist yet cool stylish To-Do List . Users can add, edit, and mark tasks as complete. Implemented react hooks and used local storage to persist data across sessions. Focused on clean UI and a smooth user experience.
- Technologies used are React, React hooks , React router and react-bootstrap

My Restaurant

[View Site](#)

- My Restaurant is a minimalist yet impactful React website that artfully presents a restaurant's menu and essential information, enticing diners with a smooth experience.
- Technologies used are ReactJs , React router, CSS grid/flexbox , Material UI and high quality images/icons.

Weather App

[View Code](#)

- Developed a weather application using Node.js and Express that fetches real-time weather data from an external API. The app allows users to see current weather information, including temperature, humidity, and conditions.

World Clock

[View Code](#)

- Developed a world clock application using Node.js and Express that displays real-time data for multiple time zones. The app allows users to view the current time, date, and time zone information for various cities across the world.

Hobbies & Interest

- MERN stack enthusiast
- Playing Chess, badminton & cricket
