Email for requesting a raise as a junior software engineer:

Subject:Request for Salary Review

Dear Mr.Gupta,

I hope you're doing well. I'm writing to request a review of my current salary formally. Over the past 2 years I have enjoyed being a part of the team and contributing to the success of various projects. I have gained valuable experience and developed my skills in backend development, frontend development,API integration, or debugging complex issues, and I believe I have grown significantly in my role.

During this time, I have successfully developed key features for the product, resolved critical bugs, or improved performance on certain modules, which have contributed to client satisfaction, or meeting critical project deadlines].

Given my contributions and growth, I would like to discuss the possibility of a salary adjustment to reflect the value I bring to the team. I would appreciate the opportunity to have a conversation about how I can continue to contribute even more to the company and discuss my compensation.

Thank you for considering my request. I look forward to the opportunity to discuss this further.

Best regards,

Hritik Sharma

Junior Software Engineer
